

# Close, Plan, and Report on One Platform.

Everything the Office of the CFO needs to drive peak financial success, and more. Replace Excel and standalone solutions with a modern, comprehensive platform that transforms the way you reconcile accounts, close the books, and plan—across every corner of the business.

The only modern financial performance management platform that combines powerful performance with ease of use for rapid ROI.

## A Comprehensive Solution Made Easy

Bring your finance and accounting functions together with control over your system. Handle sophisticated acquisitions, consolidations, intricate regional roll-ups, and more with advanced planning that extends to product, region, and business unit level detail, so you can gain true business alignment for strategic decision-making.

## More Value and Speed, Less Maintenance

Let the business plan where they're comfortable with Excel syntax, or pre-built capabilities, and get up and running seamlessly with fast adoption. Make changes on your own without an army of admins holding you back and start reaping the benefits of the system in weeks, not months.

## Scalability Without Compromise

Drive financial success with a solution designed to grow with your needs. Maintain the confidence of trusted, role-based security and controls that can support true financial reporting requirements. Easily integrate multiple systems and data sources into one application with point and click.

"I don't think we can outgrow Planful. Once you get onto the platform, you can't believe how much it can do."

Sarah Alford, Director of Corporate Accounting  
Federated Co-Operatives Ltd.

# Go Beyond the Close With a Comprehensive Financial Performance Management Platform

Planful can handle business complexity with an intuitive solution, implementation speeds faster than traditional software, and less total ownership costs. Budget, plan, forecast, close, report, analyze—have it all and start guiding the business forward with finance-first collaboration, uncompromised scalability, and a self-managed system that gives teams flexibility and control.

## Global Financial Close and Consolidation

Use secure APIs to pull every bit of GL data into a single solution with full audit trails, manages multiple sets of books, handles, multi-currency translations, and account reconciliation that doesn't just check the box.

## Robust Reporting and Analysis

Produce financial statements, expedite variance analysis, and complete forward-looking statements in minutes. Automate internal and external reporting based on GAAP or managerial results and run drill-through and ad-hoc analysis.

## Deep Financial Planning and Forecasting

Achieve planning excellence with productized capabilities, templates, and workflows with the flexibility to model anything and out-of-the-box CapEx and Workforce Planning features.

## Advanced Operational Planning

Pull in operational data to take proactive action in rapidly changing business landscapes. Provide real-time visibility into key financial metrics with extended driver-based modeling that has no limits.
