Break Even chart

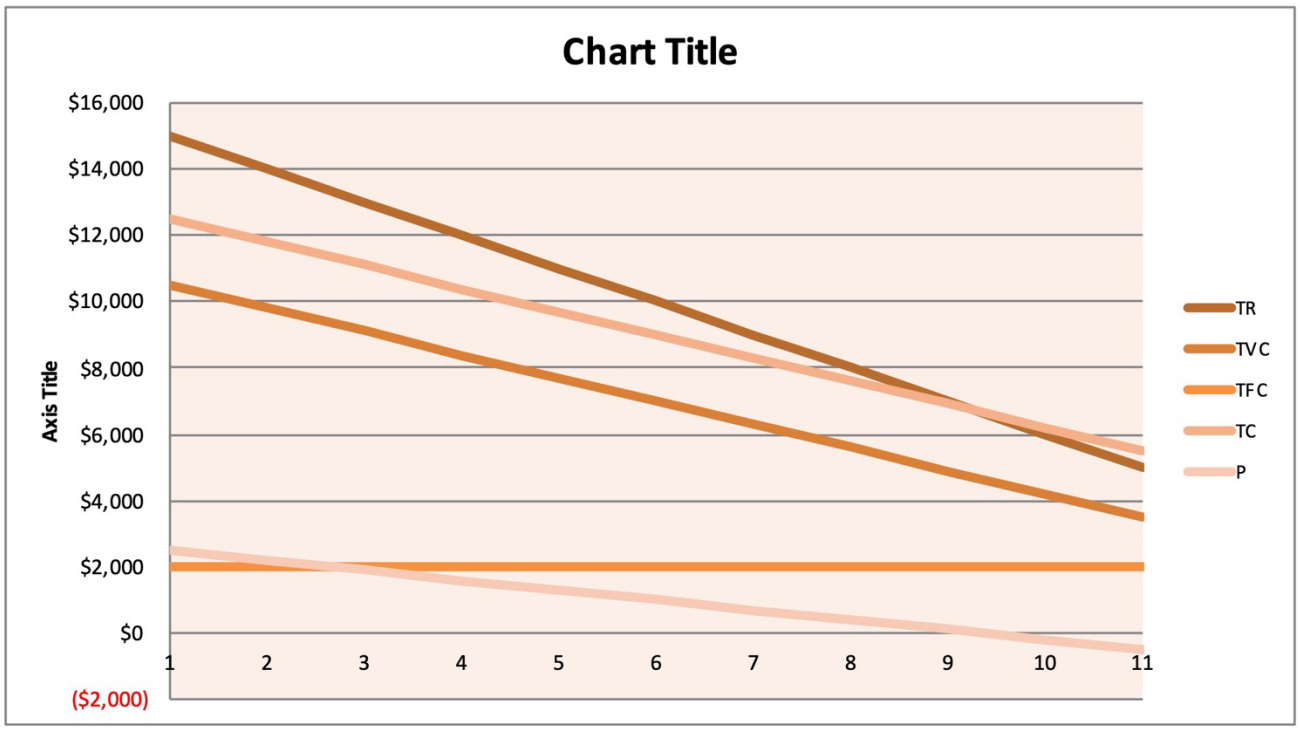

A break-even chart can help with your analysis to determine how many units you need to sell to cover costs and when a product or service is profitable.

Break-Even Chart

Total Revenue (TR):	**$10,000**
Total Variable Cost (TVC) as % of Revenue:	**70%**
Total Fixed Cost (TFC):	**$2,000**

Enter values for Total Revenue (TR), Total Variable Cost (TVC) as % of Revenue, and Total Fixed Cost (TFC) and the Break-Even Chart will display a range of values from -50% to +50% of the Revenue.

By changing these three values you can analyze how certain changes drive your bottomline.
